TECHNICAL/SOFT SKILLS

Programming

Javascript (ES6+) *async/await*

PHP, SQL

Databases

MySQL, PostgreSQL *Schema designs, joins*

Deployement

Vercel, Render *.env configuration, auto-deployment*

API

RESTful designs *Status codes, error handling*

CRUD operations, Postman testing

Fast learning

Example: quickly adapted to new stacks (Express, Supabase) for "Above You" project.

Back-end

Laravel *Blade, Eloquent*

Symfony *DomCrawler*

Node.js *Express, middleware*

Tools

Git, GitHub *Commit hygiene (conventional commits)*

VS Code

Figma *Basic UI prototyping*

Front-end

HTML5, CSS3

Vue.js *Composition API*

Tailwind

Problem-solving

Example: building and debugging HTML scrapers to handle inconsistent site structure (check "Pinced" project).

PROJECTS

[Above You 🔗](#) *2024 – Present*

MVP completed

Vue 3, Node.js, Express, PostgreSQL

- **Real-time sky tracker** *(ISS, stars, weather) based on geolocation.*
- *Solves the lack of a **simple tool** that combines space and sky data **for casual users**.*
- *JWT auth, middleware, geolocation polling, rate limiting, CORS.*
- *Haversine calc + update thresholds.*

[Pinced 🔗](#) *2024 – Present*

MVP in progress

Laravel, Symfony DomCrawler, MySQL

- **Dish-based restaurant search** *using web-scraped restaurant data.*
- *Solves lack of local dish-level search in unstructured menus, through **HTML scraping and enrichment**.*
- *MVC architecture.*
- *Planned **MySQL** database for users, favorites, and data caching.*

PROFESSIONAL EXPERIENCE

Microline Web *2018, 2019*

I.T. Internship

- *Helped **maintain** internal service dashboard (basic HTML/CSS edits).*
- *Assisted with **simple scripting (PHP)** and system configuration.*
- *Gained early exposure to backend logic and dev workflows.*
- *Supported office hardware.*

Freelance ([Fiverr](), direct clients) *2022 – 2024*

Designer

- *Designed **UI layouts** (Figma) for **websites** and **landing pages**.*
- *Applied **UX principles** to client projects.*
- *Started integrating technical tools (**Git**) to organize project files.*

CERTIFICATES

JavaScript Algorithms and Data Structures [Certification]() 🔗 *2025*

FreeCodeCamp

- ***300+ hours of training.***
- *Hands-on coding in JS (functions, loops, OOP).*
- *Solved algorithmic challenges, covering DOM, local storage, and API basics.*

EDUCATION

I.T. Diploma *2014 – 2019*

Enrico Fermi Institute *Mantua, Italy*

- *Covered **computer science fundamentals**: programming, networking.*
- *Basic web and tech-focused coursework.*

Design Diploma *2019 – 2022*

Palladio Design Institute *Verona, Italy*

- *Studied interface design, layout systems, and UX basics.*
- *Built a **strong design foundation**, now applied to full-stack projects.*

GOALS & AVAILABILITY

Roles Seeking entry-level roles in **backend/full-stack development**. Open to **adjacent opportunities**.

Goal **Learning** and becoming proficient in **backend development**.

Logistics **Car available** for hybrid roles in nearby cities.

LANGUAGES

English	Fluent
Italian	**Native/Bilingual**
